Preface

Youvan's e-book, below, "Questions of a Christian Biophysicist", ISBN 978-0-615-43573-2, is written entirely in the form of polemic questions. These ~ 800 questions indicate Youvan's firm belief in Biblical Creation as per Genesis 1-2. While some questions are at research level in mathematics, cosmology, and biophysics, other questions pertain to a broad spectrum of basic subjects ranging from family relationships to Wikipedia politics to child education. Some questions are written for fellow scientists, teachers, apologists, and pastors that have answers bordering on paradoxical or indeterminate.

Doug feels called by the Great Commission of Jesus Christ to "*extinguish Darwinism*" and spread the word that "*an intelligent man can believe in literal Creation*". He is credited with finding a pattern in the genetic code which is inexplicable by any Earthly process. His questions hit hard at secularist beliefs in the Big Bang and Evolution. His discovery of a pattern in the genetic code is published [here](#) on Wikipedia's genetic code article which receives nearly one million hits per year.

Youvan received his Ph.D. in Biophysics from UC Berkeley in 1981 and advanced to the level of Associate Professor of Chemistry (MIT) in 1990. Discovery of the genes for photosynthesis, invention of *in vitro* evolution, and discoveries in discrete mathematics are attributed to Youvan, who was later Born Again via epiphany at age 46. Youvan has attended a variety of Christian churches, including: Catholic, Calvinist, Calvary, Methodist, Baptist, Southern Baptist, Nazarene, Pentecostal, and Charismatic neo-Pentecostal in a variety of states including Kansas, Colorado, Hawaii, and California.

For readers interested in *Mathematica* programming, color, and/or the discrete mathematics used to study the genetic code, Professor Youvan's first e-book is also free and online: "Pseudocolor in Pure and Applied Mathematics", ISBN 978-0-615-43125-3, at www.youvan.com. For more information on Youvan, himself, please see his current Wikipedia biography at en.wikipedia.org/wiki/Douglas_Youvan. His biography is frequently attacked by atheist editors, so you might want to view an earlier version of his biography in Wikipedia's history shown [here](#).

All questions are in chronological order of writing with the exception of the first and last questions which were written in November of 2010. Work on this book began in October of 2010 concomitant with this web-based publication. The 650th question was written in April, 2011. If you are currently reading a paper copy of this book, that's probably from a short printer run, and it is likely that the e-book on the website is more up-to-date as more questions have been added.

1. Do you find the following quotes and comment from Darwin, Crick, and Jukes to be troubling?
 1. "Ignorance more frequently begets confidence than does knowledge: it is those who know little, and not those who know much, who so positively assert that this or that problem will never be solved by science." - Charles Darwin
 2. "The lectures will be concerned with the impact of biological ideas, both present and future, on our concept of the world. They will not be militantly anti-Christian, but nevertheless will be directed against the sort of ideas at present held by many religious people." - Francis Crick
 3. Jukes was one of the founders of the Journal of Molecular Evolution; his subsequent work with molecular evolution focused especially on the origin and evolution of the genetic code. After returning to Berkeley, he also became heavily involved in a number of public scientific controversies, and was a gifted polemicist. In the 1960s, he fought against the introduction of creationism into the California public schools.

 3. This "no intelligence event" was caused by a physical event analogous to NP or non-algorithmic mathematics.
 4. Optionally, postulate (2) can be biased by a process that can not be proved correct, such as intelligent design, god-driven, or Big Bang-theorized (etc.) mechanisms.
